

The Limit News Flash by Response Chips

Featuring the superb **2.3 16V** Turbo petrol unit which in standard form produces a very healthy **260 bhp** is now able to have its performance potential exploited with a genuine ECU reflashing option.

No bolt on ECUs or additional circuit boards, a genuine remapping of the resident software !

This increases bhp to **298bhp!** along with torque increasing by **85nm !** In addition the **speed limiter is removed** and the rev limiter is raised from 6800 rpm to 7200 !

These vehicles are superb with this additional performance enhancement and a worthwhile investment to any owner, retailing at **£799.00 inc vat.**

Please note that we also cover all other Mazda derivatives with this engine installed. Please check out our **red** listings at www.responsechips.com.
