

The Limit News Flash by Response Chips

We are pleased to introduce a genuine Re-Flashing enhancement for the **New Nissan GTR R35 V6 Twin Turbo**.

At 473 bhp in standard form this is not a slow vehicle however the potential to enhance this vehicles performance is there and we are able to offer this option to customers who want more than standard and the ability to tap into its reserves.

Power increase **95bhp to 570 bhp** along with a **90 nm** increase in mid range torque.

The rev limiter is raised by **400 rpm** and the speed limiter is also removed.

After market exhausts will see power top 600 bhp with the added advantage of being able to make changes to the map setting to accommodate additional performance enhancements.

and fitting.

The Response Performance option for R35 retails at £1250.00 inc vat

Check out our web site at **www.responsechips.com** for further developments in particular our red listings which cover an exciting range of vehicles that have previously NOT had a reflashing option available such as Mazda, Nissan & Honda petrol vehicles and many more !
