

# The Limit News Flash by Response Chips

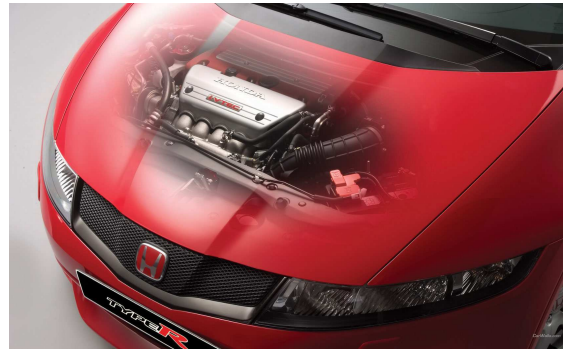

A new addition to our range is a reflashing enhancement for the new **Civic Type R 2.0 16V FN2**.

A very popular vehicle they are starting to appear more and more often and are a perfect vehicle for a response Performance Chip. Demand is starting to increase and this options by **Response Performance Chips** is an answer to this demand

Standard performance is improved from **197 bhp** to a very healthy **219 bhp**.

This does give a true full picture as there are points through the rev range where peak power is in excess of **22bhp** ! Along with a **10 12%** increase in torque.

This is genuine reflashed and does not require the fitment of ecu additions such as circuit boards or a replacement ECU.

Everything remains standard in appearance however the drive is noticeably improved and the additional torque gains help day to day performance. This is superb enhancement for this vehicle and a worth while investment at £599.00 inc vat.
