

# The Limit News Flash by Response Chips

We are pleased to introduce a genuine Re-Flashing enhancement for the **New Nissan 350 & 370Z**.

With demand for a genuine tuning solution for these vehicles we are able to provide superb performance gains for these vehicles. Power graphs are available upon request.

With the **350Z** seeing power jump from **280 bhp** to **302bhp!**

From the **later versions 301-313bhp** up to **320 - 331bhp!**

With the introduction of the new **370Z** comes an even greater potential for improvement seeing the standard output of **330bhp** rise to **353bhp**.

Of course there are **torque** gains to be had and these vehicles see between **10-12% increase** in this area with a dramatic sharpening of the throttle response.

These vehicles are really so much nicer to drive once they have been freed of their restrictions, and of course this also applies to the speed

limiter.

Please note that this enhancement takes the form of bench programming and so tuning equipment by dealers is not required.

Check out our web site at [www.responsechips.com](http://www.responsechips.com) for further developments in particular our red listings which cover an exciting range of vehicles that have previously NOT had a reflashing option available.

For further information and dealership opportunities please feel free to contact us on **0191- 3863422**
